Doing More with Less for More: Rebuilding Capital in a Circular Economy

10 October 2018 from 3:00-4:30 PM CET

Zeenat Niazi (VP, DA) as a speaker at the GGKP Webinar

The Green Growth Knowledge Platform (GGKP) is a global network of international organisations and experts that identifies and addresses major knowledge gaps in green growth theory and practice. By encouraging widespread collaboration and world-class research, GGKP offers practitioners and policymakers the policy guidance, good practices, tools, and data necessary to support the transition to a green economy. GGKP conducted a webinar 'Doing More with Less for More: Rebuilding Capital in a Circular Economy' on 10th October, 2018, where Zeenat Niazi (Vice President, DA) was invited as a speaker, along with Dr Rene VAN BERKEL (Representative, United Nations Industrial Development Organization). A live panel discussion took place, followed by an interactive question and answer session with the audience.

This webinar took place in advance of the 2019 PAGE Ministerial Conference, Advancing Inclusive and Sustainable Economies, where Circular Economy will feature as a main conference theme alongside Green Finance, Strategies and Policies for a Green Economy, and Economic and Social Inclusion.

The webinar intended to explore various initiatives that are working to 'close the loop' and transition our linear 'take-make-dispose' economy towards a resource efficient circular model. These include policy-driven circular practices in the housing and construction sector in India, approaches to boosting productivity, innovation and efficiency for circular manufacturing, and key strategies for improvement in resource efficiency in G20 countries.
