

• Carbon Emission • Deforestation • Waste Dumping

• Water and Air Pollution • Lack of Sanitation

- 6 out of 10 most polluted Asian cities are from the Indian subcontinent.
- India has lost 367 sq.kms of forest cover in the past 2 years.
- 70% of surface water resources are contaminated.
- More than 91% of the MSW collected formally is landfilled on open lands and dumps.

This is a harsh reality! Join hands and take the first step...

...CUT THE CARBON!

Become Eco citizens of tomorrow!

4000 children trained in environmental assessment and improvement activities

More than 200 water quality monitoring stations established in India

Water and Sanitation concerns addressed in over 200 schools

Partnered with Delhi Govt. in doubling the green cover of Delhi from 10% to 20%.

Designated Earth Charter Affiliate for India

Associated with Central Pollution Control Board to mutually assist and strengthen existing initiatives

CLEAN-India website won the Manthan award for best e-content on environment

CLEAN-India

Community Led Environment Action Network

CLEAN-India is an initiative of Development Alternatives that aims to harness youth power to bring about a positive change in urban society. It provides a platform for students and young professionals to prevent environmental degradation and develop cleaner towns and cities across India.

The CLEAN-India programme has a structured framework with the flexibility to address local needs. Equipped with scientific tools and techniques it addresses the entire value chain from assessment to solutions. It partners with network of schools, colleges and NGOs which drive the initiatives in their urban centres.
